

# Have you checked your washing machine?

Take care when installing your washing machine!

Did you tightly screw the joint section?

Is the drainage hose inserted properly into the outlet?

If the connectors are too loose, your washing machine can leak water to the rooms below.

# Prevent frozen pipes!

Drain water from pipes when it's cold outside!

During the winter, make sure to drain the water from your pipes before sleeping, going out, or going on a trip!

Many water pipes freeze in the winter, which stops the water flow and can cause pipes to burst, resulting in leaks.

Prevent this by draining your pipes!

If your landlord or real estate company tells you to drain the pipes  
→Make sure to confirm how this should be done
