

JEES International Scholarship (Study support), FY 2025

Voices of Scholarship Recipients

◆International Scholarship (Study support)

To the honorable representatives of the foundation, I am writing this letter with my heartfelt sincerity to express my deepest gratitude to the JEES (Japan Educational Exchanges and Services) for the scholarship awarded. I am from Myanmar, and I had been in a difficult situation to finish the Master's course due to financial situation in the recent months. Firstly, the scholarship by JEES foundation is a great relief because I had been doing a hard labor part-time job for the rent and semester fees. By the grace of the generous offer by the foundation, I am able to reduce working hours and focus more on the studies for better academic performance and able to spare more study hours to be able to graduate in the potential future.

My dream is to study and land a potential job in Japan aligning with, particularly in the field of research and development for electrical equipment in the renewable energy sector. My servicing skills built up over previous job experience drive my interest towards further studies in Power Electronics. The encouragement from the award really motivates me to push further with great faith towards my ambition with higher self-esteem.

Furthermore, I will make good use of the scholarship solely for improving the academic performance as it is the fixed amount for my living expenses to ease me from hard labor part-time job. Nevertheless, I will commit to my studies to graduate in good grading and honor the JEES scholarship foundation as the recipient of the award in the name of Sophia University.
